

2.13

Write the numbers.

Introduction:

Have the students draw faces on plastic eggs. Alternatively, use cardboard egg shapes. Arrange the eggshells in rows of 1 to 5. Place a card with the corresponding numeral next to the art display.

Consolidation:

Give each student five counters. Call out a number. Get one student to write the numeral on the board. Ask the rest of the students to show the number of counters that correspond with the numeral written on the board. Have the students practice writing the numerals 1 to 5.
