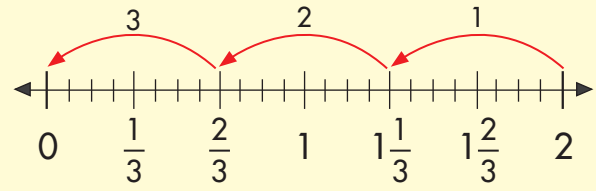
Divide 2 by $\frac{2}{3}$.

$2 \div \frac{2}{3} =$ ____



How many times can I subtract $\frac{2}{3}$ from 2 wholes?

Press C 2 ÷ $\frac{2}{3}$ =

Display $2 \div \frac{2}{3} =$ ____

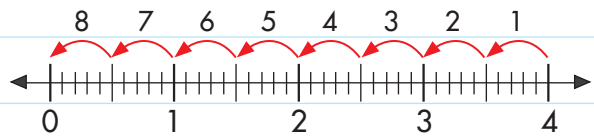
Tom summarised his findings in his journal.

Division can be seen as repeated subtraction!

For example,

$4 \div \frac{1}{2}$ can also mean the number of times I can subtract $\frac{1}{2}$ from 4.

$4 \div \frac{1}{2} = 8$



I can also find the answer using my calculator.

Press C 4 ÷ $\frac{1}{2}$ =

Display $4 \div \frac{1}{2} =$ ____
